DO-SI-DO

This home is part of a four-home development utilizing Portland's new middle housing infill building code, which allows for multiple smaller homes to share a single lot in an effort to add much-needed housing options at more attainable price points. In addition to the homes being highly energy efficient, they are much smaller in size (800-1,500 s.f.) than typical new construction and are being sold at prices that are at or below the median price of homes in Portland.

Energy Efficiency Features

- Solar Ready
- EV Charging Ready
- Induction Cooking Range
- SmartHome Setup
- All Electric - Heat Pump HVAC, Heat Pump Water Heater
- Earth Advantage Platinum/Zero Energy Ready Certified
- Above Code Energy Performance Score (EPS)

About Oregon Homeworks

Oregon Homeworks is delivering Portland's most smartly architected and designed cottage homes that are built the right way - and the right size - for a new generation of homeowners. Each of our homes features designer finishes, crisp modern architecture, and loads of green components, including being 100% all-electric, pre-plumbed for solar, and zero-energy ready.
